

Glue paws together at the two hatched areas

C - begin to roll the back under from here

Visit inspireculture.org.uk for **What's On** information!

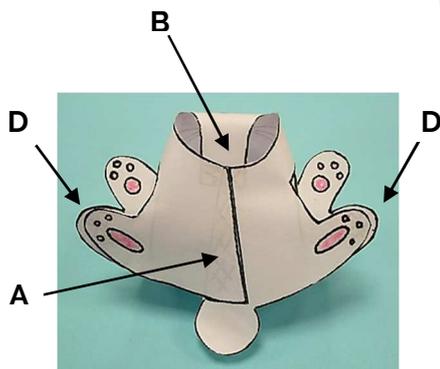

You will need:

- Scissors
- Glue stick
- Cotton wool

How To Make a Paper Rabbit:

1. **Cut all around** the solid black outline.
2. To construct the **rabbit's face and base** -overlap the paper at **A**, apply a little glue to the hatched area and stick securely.
3. Glue **chin tab B** to the base.
4. To make the **rabbit's back** - **start at C** and roll the paper until all the **paws marked D** match at both sides. Apply glue to the hatched paws to secure the roll.
5. Finish by adding a small **cotton wool** ball for a **fluffy tail** and a few strands of cotton wool for **tuffy ears**, glue in place.

Paws marked D match with the hatched paws (also marked D)
