

GALACTIC GROOVE

Lyrics by Neil Bennison

Music by Steve Pickett

Blast off with the engines roaring
High up in the sky we're soaring
On a space quest, anything could happen
Zooming past Mars and the rings of Saturn.

*We're flying, good bye-ing, far out - on a galactic groove
On our space tour, for sure, we'll see amazing views – Wow!*

Time flies as we get to warp speed
Light years into seconds now squeezed
Planets whizz past - if you blink you'll miss them
Hurtling out fast from our solar system.

*We're flying, good bye-ing, far out - on a galactic groove
On our space tour, for sure, we'll see amazing views – Wow!*

Deep into the Milky Way now
Bright stars shining all the way round
Towering high, nebulas are shaping
Colourful clouds in our constellations.

*We're flying, good bye-ing, far out - on a galactic groove
On our space tour, for sure, we'll see amazing views – Wow!*

Years on no-one wants it over
We've all seen a supernova!
Awesome Red Giants fill our dreams and stories
Of galaxies shimmering with cosmic glories.

*We're flying, good bye-ing, far out - on a galactic groove
On our space tour, for sure, we'll see amazing views – Wow!*

Wow! For sure this is our Galactic Groove!
